**NOTES.**

The Baptist passage is rapidly approaching completion.

H. B. BEATTY has commenced the erection of a new residence on Radcliffe Street above Lafayette.

JAMES MCCRAY of Bristol township, was committed to jail Friday, for selling liquor without license.

ELISHA SWANNEY has about completed a large and commodious store, with dwelling attached, at Cornwell's station.

DAVIDSON'S BROS.—Arrangements are being made toward having a Bee in Davidsville, Southampton Township.

The machinery for the new rolling mill will not be ready for shipment to this place, until about the middle of June.

DR. W. C. PARRY has removed from Edlington to Mount Holly, N. J., and is succeeded by Dr. H. D. Montgomery county.

The missions are through with their work on the new planing mill at the head of Dorrance Street, and the building is ready for the carpenters.

The annual meeting of the stockholders of the Bristol Water Company will be held on the 27th inst. for election of Directors for the ensuing year.

BRIDGE BUILDING.—The railroad bridge over the Bristol Road, near Southville, is nearly completed, the masonry work having been finished some time ago.

At the regular meeting of the Union Baptist and Loan Association last Monday evening, ten loans were sold to Eliza Saxbury at a premium of \$41.50 per loan.

This base ball team between the Burlington and the Bristol Club played last Tuesday, on the grounds of the former, resulted in a victory for the Burlington Club by a score of 3 to 2.

A. J. HINTS has commenced the erection of a fine brick residence on the river bank, on Radcliffe Street at the corner of Franklin. The front and the two sides will be built of pressed brick.

This residence of John Rowlett, of Bridge-water, was recently entered by some burglars. They were frightened away, however, by one of the inmates before they had secured any articles of value.

P. P. CHORISTON has the contract for erecting a frame dwelling house on Dorrance Street, between Cedar and Wood, for Frederick Parker. The excavation for the cellar has been made and the work will be commenced at once.

This annual meeting of the Bristol Gas Light Company was held last Thursday, at the residence of H. M. Wright, of this place. W. P. Price, (Philadelphia), Capt. C. C. and Anthony Swain, were elected Directors for the ensuing year. L. H. Hogue was chosen President and Joshua W. Buckman Secretary and Treasurer.

This business at the Foundry of Thomas Harkins has grown to such dimensions that more room had to be provided to accommodate him. He has therefore commenced the erection of a two-story stone building, near his factory to be used as a finishing room.

Mrs. FRISCHLA SCHWENY gave readings in Philadelphia last night at the Amateur Drawing Rooms, to a large and fashionable audience. The Times says she made a very favorable impression, and that the audience testified by continued applause, that they fully appreciated the talent of the declamationist.

ROBERT SMITH, who delivered a highly entertaining lecture in the Presbyterian church last Thursday evening, on "Barnabas," his native house, will repeat it on Monday evening at a collection will be taken up for the benefit of the lecturer, who is preparing for the ministry.

On last Friday evening, the great spelling match between Bucks county, Pa., and Mercer county, N. J., took place. It was estimated that one thousand people were present to witness the contest. The first prize, a gold watch valued at \$100, was won by Miss Joanna Coleman, of Yardville; the second, a complete set of Dickens' works, by Miss Lizzie Long, of Newtown. After the Mercer county spellers had been retired, there were six Bucks countians on the platform.

The COLONIAL CONFERENCE.—The Philadelphia Conference of the A. M. E. Church, whose session began in Hardsburg on Thursday last, closed its proceedings on Tuesday. The appointments in this vicinity were announced as follows: Bethel Church, Philadelphia, R. W. Wayman; Union, H. L. Lewis; Franklin, Samuel Watts; Wm. H. Phillips, Wm. B. Norris; Bristol, Richard Barley; Oxford, Thomas H. Moore; Allentown, W. J. C. Ridgway.

LAST OF LETTERS remaining in the Bristol Post Office, Wednesday evening, 12th inst.: Louisa Barton, Wm. H. Brady, John H. Barton, Henry Barton, E. Bradshaw, Jacob C. Canover, William J. Clark, Annie Condy, Geo. Donnell, Wm. H. Foster, Wm. Gallagher, Lizzie Gilliland, John Gorman, Martin Higgs, Irvine Heberling, S. H. Lincoln, Julia Mint-hill, Patrick Murphy, Henry E. Morton, Daniel McGee, Andrew McKee, James McKee, Mary A. Russell, W. K. Scarborough, Maggie Schneider, William Smith, John Smith, J. D. Smith, Richard Smith, Mrs. Dr. Williams, Thomas Wallace, William Wood, Warner Wright.

HOLMEVILLE VS. BRISTOL.—The spelling contest between Bristol and Holmeville for the benefit of the Young Men's Christian Association of the two boroughs, promises to be well attended. In addition to the interest which is felt on account of its being a contest between the two boroughs, the object to which the proceeds are to be devoted ought to attract no doubt will attract a large number of people to the hall. The work of the Y. M. C. A. of this place and the money required to keep up its organization has for the most part fallen upon one or two members of that society. This, although cheerfully bestowed by those persons, should be remedied, and the proceeds of the coming spelling match ought to be large enough to relieve them of their self-imposed burden. The arrangements for the contests are now completed. Eight prizes will be given, four at each contest, which may now be seen at J. H. Foster & Son's jewelry store. We understand that the list of words selected will be passed upon by the committee beforehand, and they will be given to the class as prepared as to prevent any unfairness or charge of favoritism to either side. Every thing appears to have been considered and noted upon that will obviate any jar or discord which the rivalry between the two boroughs might excite.

**A FLYING TRIP.**

On last Tuesday a special train of three place cars passed through Bristol from New York to Philadelphia and return. On the train were a number of the merchants of New York, guests of the merchants of Philadelphia in an entertainment which was intended to produce community of interest and harmony of action between the two cities at the coming Centennial exhibition.

The three place cars were drawn by the best engine belonging the road. The time table allowed two hours for the trip. The way the excursionists speed through cities indicated that the published time table was to be beaten. The train arrived in the heart of the Centennial grounds in Philadelphia just one hour and forty-eight minutes after the engine had pulled in Jersey City.

An immense concourse of influential Philadelphians had assembled, awaiting the arrival of the guests.

Preceded by a band of music the party visited the Memorial Hall, a representative of the buildings that is to outlive the exposition. It is to be a structure faced with granite three hundred and fifty-five feet in length, two hundred and ten feet in breadth, and fifty-nine feet high, surmounted by a dome.

The main Exhibition Building, or the space it is to occupy, was next visited. It is to be 1,850 feet in length and 464 feet in width. Its several stories will comprise an area of twenty-one and a half acres. It is to be built of iron and steel.

After the time the machinery building, a frame work, and the horizontal and agricultural buildings, which are even less far forward in construction, were visited. They being temporary, will not require so much time, and the architects in charge are confident that they will be ready as early as any of the other buildings, although they are to comprise an area of over eleven acres.

After witnessing the progress of the various buildings the guests were driven to Fitchmont Hall, a park restaurant. An ample collection was served, and at the board Morton McMichael, flanked by ex-Governor Bigler, W. E. Dodge, A. E. Rio, S. B. Chittenden, and J. H. Vail, the President of the Centennial Board of Finance. After the dinner had been discussed speeches were made by Morton McMichael, William E. Dodge, S. B. Chittenden, Henry A. Brown, and others.

The Centennial party returned to New York in about two hours, making less than four hours for the entire trip, including two stoppages. A liberal purse was contributed for the engineer and fireman of the fastest road trip ever made between Philadelphia and New York.

COUNCIL PROCEEDINGS.—A stated meeting of Council was held last Monday evening at the Town Hall. Present, Chas. E. Scott, Burgess; S. A. Walmsley, James M. Slack, C. W. Peirce, S. S. Rue, Jonathan Wright, J. M. Wright, and J. Wesley Wright. The minutes of the proceedings regular and special meetings were read and approved. The Street Committee reported that the street lamp on Bond Street near the bridge, had been removed to the corner of Bond and Mulberry Streets, also that they thought it advisable to put in a brick culvert at Mill and Cedar Streets, and in a plank one as had been proposed, and asked for further instructions. On motion the Street Committee were empowered to use their own judgment in the matter.

BILLS PASSED.  
 Charles S. Bailey, copy of assessment, \$10.00  
 H. L. Tomlinson, care of oil houses, \$5.00  
 John Duvall, labor, \$20.00 for care of lamps were referred to the Street Committee.

The bond of C. W. Peirce, conditioned for his faithful performance as Treasurer of the borough was received and approved.

C. W. Peirce asked Council to grant C. W. & J. Peirce permission to run two railroad tracks across Washington Street at the Livingston Mills. Permission was granted with the proviso that the tracks be taken up at their own expense at any time that Council might order them removed. On motion the Constable was directed to assess all dogs in the borough at \$1.00 per head and charge the same against their respective owners. Council then on motion adjourned.

CHANCE FOR A CATHEDRAL.—Hon. Alan Wood, through the columns of the Norristown Herald, gives a notice to the young men of Bucks and Montgomery Counties in reference to filling a cathedral at the West Point Military Academy. His card is as follows:

I request grace to announce to the young men resident in the 7th Congressional District that I am desirous of securing a young man to nominate a candidate for admission to the United States Military Academy at West Point, and that I have requested Mr. John W. Lock, of Trenton, Secretary, Norristown, H. K. Wendt, attorney-at-law, of same place, and Dr. J. K. Reid, of Conshohocken, to act as a committee for the selection of a suitable candidate by competitive examination.

The conditions for admission are briefly as follows:

Candidates must not be less than seventeen nor more than twenty-two years of age, at least five feet in height, and free from any disease or infirmity which may render them unfit for military service. They must be well versed in reading, writing, (including orthography and arithmetic), and have a knowledge of the elements of Euclid, algebra, geometry, and trigonometry, particularly of our own country, and of the history of the United States.

The law is imperative that candidates shall reside in the Congressional District.

Candidates may apply, by letter only, stating name, age and address, to me as soon as possible.

All candidates so applying must report to Mr. John W. Lock, at the Trenton Seminary, on Monday, the 17th day of this May, at 10 o'clock, A. M., for examination by above named board.

The candidates selected will be required to report to West Point for examination on the 15th of June, at 10 o'clock, A. M.

Rep. of the 7th Congressional District, Conshohocken, Pa.

C. S. BAILEY completed the assessment of taxable property in Bristol Borough last week. We are indebted to him for the following statement: The number of taxables is 1195, of whom 472 are property holders and 554 are non-property holders. There are 545 persons liable to perform military duty. The total valuation is \$214,865, being an increase of \$30,000 over last year. As the assessment is about one third the actual cash value, the total value of real estate in the Borough is nearly \$2,500,000, and the increase in value over last year upwards of \$300,000. The annual sales of liquor, as given by Hotel Keepers of the Borough is \$10,600. There are 60 non-residents owning property in Bristol.

From Northampton.

Ely & Son are doing a brisk business, receiving the favor and esteem which they are so justly merit.

Calls are heard all along the line for more bees, and they will presently swarm for the benefit of different deserving objects.

Our village has two of the most accomplished elegants in this section, and the church attendance is consequently "very good."

"Bees and Bees" is the title of a new Sunday school singing book, recently published by Higlow & Main, and adopted in this section. The same firm are supplying temperance organizations with "The Tide Wave," and other musical temperance works.

The teachers of this entire section have distinguished themselves in our late spellings, but some others they haven't received much of our prizes.

HOBBS B. EATHEBURN was unanimously elected County Superintendent at the convention of School Directors held in Doylestown on the 4th inst. The salary was voted at the same meeting from \$1275 to \$1500.

Toga county has elected Miss Sarah J. Lewis, a graduate of the State Normal School, County Superintendent of Common Schools.

**THE BUREAU OF AGRICULTURE.**

A circular from the Chief of the Bureau of Agriculture of the Centennial Exhibition, Mr. Burnet Laidley, has recently been issued, urging upon agriculturists, manufacturers of agricultural machinery, and others, such aid as will ensure the success of this department of the Exhibition. From the circular we extract the following information:

It is understood that the Centennial Commission has concluded to have the Live Stock display at the International Exhibition, within the months of September and October, 1876; the periods devoted to each class and family being fifteen days, and the divisions as follows:

Horses, mules and asses, (as one class), from September first to fifteenth.

Turned Cattle, (of all varieties), from September twentieth to October fifth.

Sheep, swine and goats, (as one class), from October tenth to twenty-fifth.

Poultry will be exhibited as a permanent and also as a temporary show, the first commencing on the opening of the Exhibition, the latter from October twenty-fifth, to November tenth.

Animals must be of pure blood to be qualified for admission, (excepting stock and fat cattle excepted), and even those of pure blood must be highly improved.

The exhibition being open to the whole world, it is of the first importance that we bring forward the best of their kind, only, as the character of our stock will be judged by the general average of those exhibited.

Exhibitors will be expected to provide for feeding their stock.

All forage and other food will be furnished at cost prices at depots conveniently located within the grounds.

Exhibitors will also be expected to furnish their own attendants, on whom all responsibility of the care of feeding, watering and cleaning the animals, and also of cleaning the stalls will rest.

Through the Commission will erect ample accommodations for the exhibition and protection of Live Stock, contributors who may desire to make special arrangements for the display of their live stock, will be afforded facilities, at their own cost.

All animals will be under the supervision of a veterinary surgeon, who will examine them before admission to guard against infection, and who will also make a daily inspection, and report.

In case of sickness, the animal will be removed to a suitable enclosure, specially prepared for its comfort and medical treatment.

Rings will be provided for the display and exercise of horses and cattle.

It is highly important that all who design exhibiting, should now make application, as the extension of preparation necessary can only be regulated by an estimate based upon actual demands.

It is the purpose of the Centennial Commission of the International Exhibition, and an especial object of interest to the Bureau of Agriculture, which has been charged with the reception of fruits for exhibition, to afford every inducement and facility for a full and complete display of the fruits of our varied climates, and also those of more northern and tropical regions.

It being questionable as to the practicability of exhibiting many perishable fruits, the products of the tropics, models in wax and plaster will be acceptable.

Such a display of Pomological products as heretofore designated will, in a special order, cover the entire period during which the Exhibition will be open, though at all times varying in importance and extent. For instance, berries and other small fruits will be included in this department, and of these there will be certain classes as strawberries from the South, ready for exhibition on the opening day; and of similar character being assembled together, that more of the same kind and variety will be presented in an increasing scale as the season advances.

It will be perceived readily, that the most important display will be made during the months of September and October.

The Commission for the exhibition and display of location of fruits sent to the exhibition, will be according to their species and variety, all of similar character being assembled together, that more of the same kind and variety will be presented in an increasing scale as the season advances.

Exhibitors may be assured that the proper arrangements will be made for the united interests of themselves, and pomological societies.

It is hoped that the Pomological Societies of the several States, and individual cultivators generally, will co-operate in an effort to place before the world the evidence of the resources and capacity of our country in respect to fruit and pomological products.

The Centennial Commission is making thorough provision for the reception and display of agricultural machinery and implements.

A section of the Agricultural Hall, an imposing structure covering ten acres, will be set aside for the exhibition of farm appliances, and it is anticipated that this feature will be second to none in the agricultural department of the International Exhibition.

It will be evident to the manufacturers of agricultural machinery that as this our national exhibition, is also open to the competition of the whole world, which has been invited to participate, our past progress and present position will be thoroughly scrutinized, and we shall be judged by the general average. Therefore, the admission of any object will be granted only when it possesses a character of unquestionable worth, and in the use of machinery, under the ruling of the Commission, the elements of merit had to include considerations relating to originality, invention, utility, quality, skill, workmanship, fitness for purpose intended, adaptation to public wants, economy, and cost.

Within the Agricultural Hall will be steam power, and all necessary appliances for driving all such machinery as cotton gins, sugar presses, plantation mill, threshers, fanning mills, &c.

It is contemplated to test in the field, plows for animals and steam power, reapers, mowers, rollers and hay racks.

Manufacturers, desiring to compete in the field will be required to use the same machines as they offer on exhibition.

It is the desire of the Centennial Commission of the International Exhibition to afford all reasonable facilities for the exhibition of fish and the various appliances and processes used in fish culture.

All parties engaged in the propagation of fish as a business pursuit will, no doubt, find it of advantage to exhibit, as also, those who are engaged in the manufacture of appliances for the culture and capture of fish.

It is therefore suggested that the Commissioners of Fisheries of the various states, take such concerted action as may appear absolutely desirable to exhibit, and to present them in ever palatable form, can hardly be relied upon as expressing the importance and prospective extent of this new national industry.

The exhibition will open May 10, 1876, and will continue for six months. The details of arrangement for a display of fish and fish breeding apparatus will be under the administration of the Bureau of Agriculture.

**THE SCHILLER DISASTER.**

On the 28th of April, the steamship, Schiller, of the Eagle Line, sailed from New York for Hamburg, Germany, by way of Plymouth, England, and Liverpool, and was last seen on the 28th cabin passengers, 120 steerage passengers, and crew, including officers, numbered 124 men making the whole number of persons on the vessel 192. On the night of May 10th, at ten o'clock, during a dense fog, the Schiller was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall. There were no lights on the Schiller, and the Retriever was not seen until the Schiller was within a few miles of the Scilly Islands, and was about to enter the English Channel on her way to Liverpool, when she struck on the Retriever, a small schooner, and was wrecked on the edge of the Scilly Islands, a group of several hundred small islands, lying at the mouth of the channel 30 miles southwest of Land's End, Cornwall.
